QLF Agronomy L-CBF TerraFed 1-0-3 (liquid carbon based fertilizer) is a combination of balanced crop nutrients with complex carbon sources. QLF’s Soil Nutrition Solutions feed soil biology and enhance plant nutrient availability.

**CHARACTERISTICS**

- **Provides a BOOST in Growth:** QLF Cane Molasses with 35% sugars packaged with a fermentation yeast extract in L-CBF TerraFed 1-0-3 help increase soil microbes and support plant growth. Microbes help make soil nutrients more plant-available, improve soil structure and speed residue decomposition.

- **Natural Forms Nutrients:** Nitrogen, Potassium, and Micronutrients packaged with a natural chelating agent and Stabilizer (Citric Acid) to improve plant performance and better root development.

- **All Major Crops:** L-CBF TerraFed can be applied to corn, soybeans, alfalfa and small grains. It can be used as a stand-alone starter on corn, soybeans, and small grains, and applied at cultivation as a side-dress for corn and soybeans. Also broadcast as a foliar to alfalfa after each cutting. Ask your consultant for more information on dilution rates and application methods.

- **User Friendly Package:** L-CBF TerraFed has a low pH (4.5) and is compatible.

**ANALYSIS**

- Total Nitrogen (N) ...............................1.0%
- 0.75% Ammoniacal Nitrogen
- 0.25% Urea Nitrogen
- Soluble Potash (K2O) ...............................3.0%

**INGREDIENTS**

- Derived from Sugar Cane Molasses
- *0.15% Slowly available nitrogen from Sugar Cane Molasses

**TECHNICAL**

- Net Weight: Bulk as Invoiced
- Weight Per Gallon lbs/gal at 68°F ..............10.5
- Specific Gravity ...................................... 1.263
- pH at 68°F .............................................. 4.5
- Critical Low Temperature ...................... 20°F
- Sugar .................................................. 35%
- Salt Index (electrical conductivity) .......... 10

**APPLICATION**

Refer to soil test and your consultant for specific uses.
