#1 Goal of Starting Cattle: Get Them Eating!

Bottom Line - -QLF Provides Essential Nutrition for Optimal Health and Performance

The receiving period is the most critical time in the feedlot. Calves experience the greatest amount of stress and disease challenge leading up to and during this period while feed and nutrient intakes are the most depressed. Proper nutrition is important to supply the immune system with the needed tools to respond effectively to eliminate or lessen the severity of the disease challenge.

A Starter Program Must Get Calves On Feed!

56 Day Feed Intake-Healthy vs Morbid Cattle

Animal Health Is Critical!

Comparing ADG & DOF, non-treated cattle gained over ¼ lb/day more and finished 10 days sooner than treated cattle.

#1 Goal of Finishing Cattle: Efficient, Profitable Gain

Bottom Line - -QLF Enhances Feed Efficiency and Greater Additive Efficacy

Finishing cattle is done with one primary goal in mind: Efficiency! Feed efficiency is largely dependent on a consistent supply of nutrients and additives to the rumen. Therefore, improving ration consistency promotes more efficient gains. QLF Liquid Supplements have been shown to increase ration consistency.

Get the Most From Your Supplement. Reduced Ration Variability means:

- More Consistent Nutrient Intakes
- Greater Feed Efficiency
- Improved Feedlot Performance and Additive Response

Ration Nutrient Variation - Liquid vs Dry Supplement

Cattle Performance - Liquid vs Dry Supplement

Get the Most Out of Your Feed Program with QLF Supplements!

- Improve Feed Efficiency
- Greater Additive Efficacy
- Improve Nutrient & Additive Dispersion
- Improve Palatability
- Consistent, Uniform Intake Within Each Pen
- Improve Cattle Performance
