QLF Agronomy products were applied at 7 locations across the state of Wisconsin as a part of a farmer trial experience. Below is the average ROI across all locations. Cost included product and application cost and rates varied from 4-6 gallons. Sampling was done 18-35 days after application. These trials consisted of 7 farms, 6 counties from Southwest to the Northeast, 20 treated plots, 18 control plots, 150 scissor cuttings and 37 lab samples.

You can't stop quantity when you feed with quality!
