SUMMARY

FOLIAR APPLICATION

Product: L-CBF TERRAFED™ & CX1
Crop: Alfalfa
Application Timing: After first crop
Application Rate: 5 gal/acre

RETURN ON INVESTMENT

$90.38/ACRE

Alfalfa treated with L-CBF products showed a deeper green color, increase in forage mass, and enhanced quality feed value. The ROI was calculated as a combination of increased yield and quality. The increase of RFQ (8%) may aid in the performance of livestock as fed. For dairy producers, this could mean more milk yield and increased profitability. This enhancement in quality was recognized at the 2019 WDE Superbowl Forage Contest where it placed 8th out of 23 samples in the Dairy Hay Division.

*ROI figured on $260/ton Organic Alfalfa
