**SUMMARY**

**Product:** L-CBF BOOST 4-0-3-2S  
**Crop:** Soybeans  
**Application Timing:** V3  
**Application Rate:** 2 gal/acre  
**Application Method:** Foliar Application

**Application Treatment:**  
- 50 oz Acetochlor Pre-Mix  
- 0.3 oz Cloransulam-Methyl  
- 8 oz Clethodim  
- 2 lbs AMS  
- 1 gal/100 gal MSO  
- 2 gal L-CBF BOOST

The above application treatment was applied June 3rd, 2020. The soybeans measured 2-4 inches and the giant ragweed measured 10-12 inches. The below pictures were taken June 4th, 2020. These photos demonstrate that L-CBF BOOST reduces burn on soybeans and helps weeds absorb product to metabolize the treatment more efficiently. The soybean plant pictured below shows no signs of damage or burn while the giant ragweed pictured below is responding to the treatment and dying.

*Results may vary. Always perform a compatibility jar test before application.*
